

OKUME

Core Material: European poplar from fast-growing, certified plantations.

Decorative Faces: Okume, a tropical wood with smooth texture and warm, natural tones, ideal for furniture and decorative applications.

Glueing classes:

- **Class I** (Dry Conditions): for interior use where the wood won't be exposed to moisture
- **Class II** (Protected External & Damp Internal Conditions): for places that may have higher humidity or partial exposure to moisture
- **Class III** (Exterior Conditions): for outdoor use where the plywood may be fully exposed to the elements

Lightweight, stable nature and ease of machining make this product versatile for a wide range of applications, from interior furniture to exterior constructions.

Glueing

Class I, Class II, Class III

Emissions

For glueing class I: E1, E05
For glueing class II, III: E1

Sizes

2500 x 1220 mm
